

MONETARY GRANT FOR DISTRICTS, SCHOOLS, AND STATE EDUCATIONAL DEPARTMENTS.

(Please pass this on to your schools)

Green School Project is providing cash grants to schools, districts, and state educational departments that will recycle depleted printer cartridges and copying machine toner cartridges (instead of throwing them in the trash). Participants receive quarterly payment checks for their participation. Schools that have an effective person in charge of this grant generally receive over \$1000.00 per year. Central offices and state departments of education are also eligible and typically receive payments in the thousands per year. There is **NO MAXIMUM LIMIT OF GRANT MONEY** that a school, district, or State DOE can receive through this program.

TO RECEIVE THIS GRANT:

1) Go to the foundation website at <http://www.greenschoolproject.com> and sign up by clicking on either "school" or "district".

OR

To enroll all of your schools in a district, email vern@greenschoolproject.com with "Entire District" in the subject line. Be sure to include your E-mail address, Name, Position, District, Street Address, City, State, Zip, Telephone#, and Fax#.

2) Begin retaining & collecting used printer cartridges and copying machine toner cartridges. You can have staff members, students, parents, or even local businesses (such as school adopters or partners in education) contribute empty copying machine toner and printer cartridges to fill the bin.

3) We will send you PRE-PAID POSTAGE labels and containers. When the container arrives, place the cartridges in it and send them in using the PRE-PAID POSTAGE labels.

4) **RECEIVE YOUR CHECK** (checks will be made payable to the school, district, or educational department and are issued quarterly).

OUR FUNDING WILL ALLOW YOU TO SEND AS MANY CARTRIDGES AS YOU CAN AS FREQUENTLY AS YOU CAN, INDEFINITELY!!!!

WE DO THIS BECAUSE:

***We are current and former teachers that are committed to doing our part to keep the earth green as well as providing schools, districts and State DOEs with additional resources.**

***1.5 million used cartridges go to landfills each month.**

***The plastic in each cartridge takes more than 1,000 years to decompose.**

***In 7 months, cartridge recycling saves more oil than dumped in the Exxon Valdez oil spill accident.**
